MEMORANDUM FOR: Assistant Director for Scientific Intelligence

SUBJECT: Collection Other Than AQUATONE, vis-a-vis,
the [REDACTED] Installation

25X1A

1. You will recall that at the Intelligence Advisory Committee meeting in my concluding remarks I indicated that in addition to the work already organized by the DD/I with regard to additional investigation of the [REDACTED] Installation through JAEIC and GMIC collection facilities other than AQUATONE that might prove useful would be alerted to procure relevant information where and however possible.

25X1A

2. It seems to me that the most sensible way for this to happen is that those who are studying the problem, to wit, JAEIC and GMIC, should refine the requirements and place them directly on the relevant collection facilities.

3. If you agree with this, would you proceed to accomplish this as you see fit with the necessary participation of the other agencies.

4. In order that the members of the Ad Hoc Requirements Committee may be up-to-date on this request, I am sending a copy of this memorandum to them.
